## IRS CIRCULAR 230 DISCLOSURE

To ensure compliance with requirements imposed by the IRS, we are now required to advise you that, unless otherwise expressly indicated, any written tax advice in this communication (including any attachments) is not intended or written by the author to be used, and it cannot be used by any taxpayer, (i) for the purpose of avoiding penalties that may be imposed on the taxpayer or (ii) promoting, marketing or recommending to another party any transaction or matter addressed in this communication.

## GOALS AND OBJECTIVES

1. Maintain our customary lifestyle. This should take about $\$ 500,000$ annually after all taxes and gifts.
2. Retain $100 \%$ ownership and control WISE within our immediate family for the purpose of furthering our values and the company's values.
3. Remain involved at the strategic planning level with the company.
4. Increase our involvement with and giving to the causes we care about including our church, military families and the environment.
5. Leave our boys and opportunity to continue to work together to build the company, not an opportunity to retire early. Our interest is to enable them to continue to serve our employees and clients, not to make them independently wealthy.
6. Keep $100 \%$ controlling interest in the company in our immediate family. Protect assets from threats from lawsuits, creditors and potential divorces of our children and grandchildren.
7. Fund a family controlled charitable foundation to support our charitable involvements and to build character, capabilities, confidence and values in our family members.
8. Leave our vacation home to a multi-generational trust to make it possible for our children and grandchildren to continue to enjoy the home together.
9. Eliminate any estate tax using charitable gifting techniques provided that our goals for family wealth transfer and family control of the company can be met.
10. Set aside up to $\$ 200,000$ per grandchild to fund higher education or other life and character building endeavors.

## CURRENT ESTATE DISTRIBUTION DIAGRAM

DEATH OCCURS IN 2012

## RECAPITALIZE WISE, INC.

STRATEGY \# 1

## RECAPITALIZE WISE, INC.

## KEY BENEFITS AND DESIGN CONCEPTS

## KEY BENEFITS

- Create ideal assets for family gifts and sales and other planning strategies
- Provide an efficient way to transfer assets to children
- Retain control of assets transferred to heirs
- Avoid prohibited transfers to foundations/prohibited vehicles

## DESIGN CONCEPTS

- A recapitalization is an income tax-free corporate reorganization for both the current stockholders and the corporation, assuming that the reorganization has a valid business purpose.
- We are illustrating a recapitalization of WISE, Inc., which will separate the existing shares into two classes, $10 \%$ voting and $90 \%$ non-voting.
- By retaining the voting class shares, you will maintain control of the business.
- The non-voting shares may be subject to an discount due to lack of voting power.
- Recapitalization can provide a means of making stock available for future wealth transfers.

## INSTALLMENT SALE TO IDIT

STRATEGY \# 2

## INSTALLMENT SALE TO IDIT

## KEY BENEFITS AND DESIGN CONCEPTS

## KEY BENEFITS

- Freeze value of stock at date of sale
- Current record low interest rates
- Reduce gift and estate tax
- Increase benefits to heirs
- Maintain needed cash flow as replacement for compensation
- Retain control of assets transferred to heirs

## DESIGN CONCEPTS

- You gift WISE non-voting shares to the IDIT using your remaining lifetime exemption. Then you sell WISE, Inc. a minority of your voting and all of your remaining non-voting shares to the IDIT. You retain a majority of the voting shares to remain in control. You finance this sale through a low interest, installment sale with a balloon payment of principal due after a period of years.
- Jeff and David provide personal guarantees for the note the IDIT owes to you.
- We have assumed the note will bear an interest rate of $2.23 \%$. Thus, your payments will be $\$ 1,552,328$ annually. The IDIT will obtain the funds to make these annual payments to you from WISE, Inc. dividends.

The term of the note is 30 years. There will be no penalty for prepayment of principal.

- Since the trust is a "grantor trust," you will personally report and pay the income tax on the earnings attributable to the assets in the trust. This is actually a wealth transfer benefit since the tax you pay on behalf of the IDIT beneficiaries is not subject to gift tax.
- Over time, the growth in the assets of the IDIT will create benefits for your family. This growth will pass outside your taxable estate.
- Since you retain a majority of the voting shares, you remain in total control of WISE, Inc.

## INTENTIONALLY DEFECTIVE TRUST

HYPOTHETICAL VALUES

| ASSUMPTIONS |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| 25 | - | 398,853,152 | 69,611,111 | 1,552,328 | 329,242,041 |
| 30 | - | 554,303,317 | 69,611,111 | 1,552,328 | 484,692,206 |

## BUY/SELL FAMILY LIMITED PARTNERSHIP

## STRATEGY \# 3

Accomplishes Three Objectives:

1. Passes voting shares to Jeff and David from estate
2. Funds Buy/Sell agreement
3. Creates source of cash outside estate to pay estate taxes

## JEFF AND DAVID

Contribute their WISE, Inc. stock to a Family Limited Partnership. Eventually own $100 \%$ voting control in WISE, Inc.

In future, at time
of 2nd estate

## GEORGE AND CAROL

(AT 2ND ESTATE)
Estate sells voting shares to FLP in exchange for cash in accordance with buy/sell agreement.

## BUY/SELL FAMILY LIMITED PARTNERSHIP KEY BENEFITS AND DESIGN CONCEPTS

## KEY BENEFITS

- Pass WISE, Inc. voting control to your children from your estate
- Create a source of liquidity to fund Buy/Sell Agreement
- Prevent large dividend distributions directly to Jeff and David during your lifetimes
- Use large dividend distributions to facilitate estate-tax free transfer of stock to Jeff and David
- Partnership provides important asset protection and future wealth transfer benefits

## DESIGN CONCEPTS

- Jeff and David contributed their WISE Inc. stock to Family Limited Partnership (FLP) in exchange for LP interests.
- George and Carol enter into a buy/sell agreement with the FLP in which they agree to sell WISE Inc. voting stock to the FLP from the second estate.
- To fund the buy/sell agreement the FLP purchases a $\$ 18.0$ million survivorship policy insuring George and Carol. Corporate dividends provide the FLP with cash flow to make premium payments.
- The FLP uses insurance death benefit to purchase voting shares from the second estate. This also serves to provide the estate with liquidity to pay estate taxes.
- After the fulfillment of the buy/sell agreement at the 2nd estate, the FLP may dissolve and distribute the voting shares and any other assets equally to Jeff and David.

## BEQUEST TO FAMILY FOUNDATION

STRATEGY \# 4

## BEQUEST TO FAMILY FOUNDATION

## KEY BENEFITS AND DESIGN CONCEPTS

## KEY BENEFITS

- Reduce estate taxes
- Make large charitable contributions
- Avoid IRD tax

## DESIGN CONCEPTS

- You can avoid estate and IRD taxes by leaving your qualified plan, IDIT note receivable and other assets to a family foundation from your estate.
- You set up a new charitable foundation structured as a Supporting Organization. This type of family foundation permits passing the large IDIT note receivable to the foundation without triggering adverse self-dealing penalties.
- Your estate receives a charitable estate tax deduction for all assets passing to the family foundation.
- After your bequest to the family foundation, the IDIT would continue making note payments. This would provide the foundation with an ongoing source of income to make distributions to charitable causes.

## DETAILED HYPOTHETICAL PROJECTIONS

The following hypothetical projections are included largely to help your other advisors evaluate the details and assumptions used to derive results contained in this analysis. The purpose of the projections is to consider a possible outcome of your current plan and to provide a baseline against which to compare our recommendations. These and other projections contained in this analysis are not intended to suggest that circumstances will actually turn out as illustrated. In fact, we are confident that they will not. Instead, the projections, based on assumptions common to the current and proposed plans, are intended to highlight the difference between the plans. This difference is the important thing, not the absolute values indicated in either plan.

The pages that follow may include: details of the current analysis, details of each individual strategy, and aggregate results of all the strategies with respect to asset values, cash flows, income taxes, estate taxes and gifts of various types.

In developing these projections, numerous simplifying assumptions have been made. For instance, average income tax rates have been used instead of referring to actual tax tables. This allows us to blend Federal and State taxes; and long-term and ordinary income tax rates in a way that does not place undue emphasis on details that are likely to change over the years.

Assets in both spouses' estates have been combined for projected growth calculations. The ratio of joint to separate property in the combined estate is assumed to remain constant.

Additionally, itemized deductions are estimated and increased at the assumed inflation rate, and rates of return are assumed to be net of administrative and money management fees. Also, the value of general partnership interests and managing member interests are assumed to be negligible for planning purposes. When a GRAT or a QPRT is part of the proposed planning, the actual benefits to heirs could actually be slightly higher than illustrated if death occurs during the terms of these trusts because the illustration does not credit back the use of the lifetime exemption attributed to the gift(s).

If, upon careful evaluation, the participants in the planning team determine that any of these simplifying assumptions are unreasonable, we can add additional layers of analysis as needed to generate the desired results.
